Connected, collaborative, interdisciplinary

Bentley's civil design and engineering solutions are model-centric, enabling project stakeholders to simultaneously work across disciplines with the confidence that data is up to date. In addition, because Bentley's solutions are scalable for large datasets, you can mitigate crashes and down time while maximizing project efficiency and accuracy. Reference bridges on roadway projects to see clashes prior to construction documentation. Design, analyze, and visualize subsurface utilities in your road, site, rail, and tunnel projects. Experience comprehensive collaboration at its best.
