

BCDE Capabilities

The BCDE common data environment (CDE) provides flexible, yet powerful data, document, and spatial information management in the cloud. BCDE helps you improve the management and control of digital information to drive bottom-line improvements across every stage of a project and asset lifecycle. Well-managed information enables project delivery teams to collaborate and work more effectively, and for asset owners to access trusted data across their digital estate. BCDE ensures compliance and peace of mind, with three license options to scale to your needs and budget.

Improve Collaboration

- ◆ Share documents and drawings securely with all users
- ◆ Browser-based ISO 19650 common data environment
- ◆ Streamlined views to remove project clutter
- ◆ Tasks can be assigned to roles, eliminating overheads with starters and levers
- ◆ Available on laptop, mobile phone or tablet
- ◆ External sharing via links or QR codes

◆	◆	◆

Document Management

- ◆ Drag-and-drop upload
- ◆ Import document metadata from spreadsheet
- ◆ Document version control, audit history, and renditions
- ◆ Lock Documents to a named user, company, or role
- ◆ Simple or advanced search
- ◆ Create many References to a Document
- ◆ Quickly update document metadata for thousands of documents via a spreadsheet
- ◆ Download associated renditions or versions from listings

View and Mark Up

- ◆ View, compare, and mark-up documents and 2D drawings
- ◆ Integrated in your browser
- ◆ Measurement

◆	◆	◆
◆	◆	◆
◆	◆	◆

Dashboards and Insights

- ◆ Summary dashboards per project for users and companies
- ◆ Configure regular reports on tasks and performance
- ◆ Export document or form information for inclusion in external dashboards or KPI's
- ◆ Integration with ProjectWise and Synchro dashboards – requires access rights

◆	◆	◆
