Project delivery is more complex. ProjectWise is evolving to make it easier for you.

Increasing complexities:

Workforce Evolution — Good talent is hard to find and hybrid working is here to stay. How do you still compete?

Accelerating Client Demands — CEOs know digital delivery will be the norm. What's your plan?

Emerging Business Opportunities — New opportunities for engineering design firm services are here now. How will you seize them?
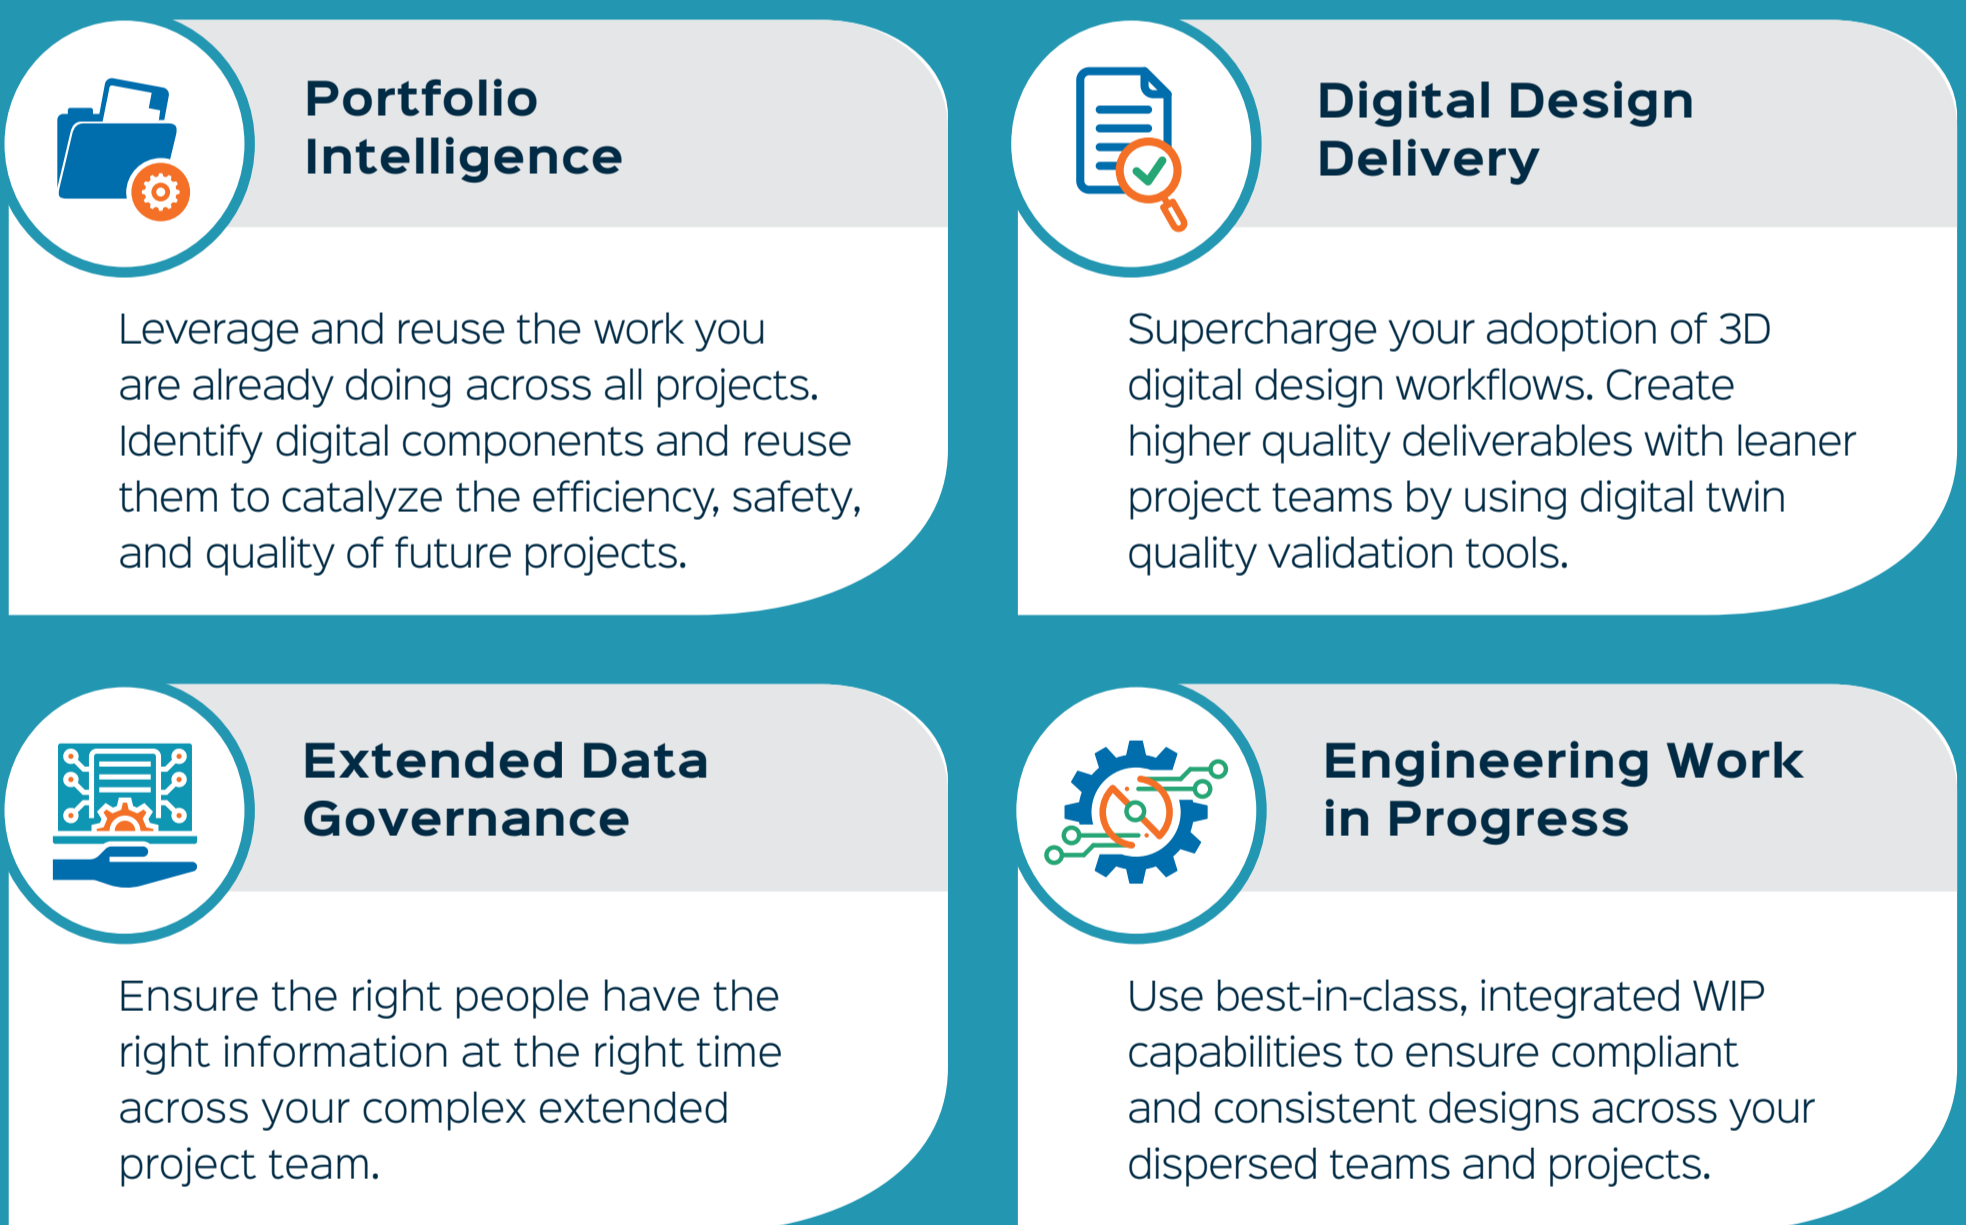

Learn how ProjectWise, powered by iTwin, is helping people like you meet the challenge.

You don't need to start over...

We heard you. We are introducing additions to ProjectWise to help you easily deal with these complexities. From product enhancements to success services to simplified pricing and packaging, we are making it easy to have the right tool at the right cost.

Like other leading engineering firms, you will move beyond using ProjectWise as a project delivery workhorse to a source of powerful data intelligence used across all projects. You don't have to start over. Build on the work you are already doing. We are here to help you.

Here is how we are evolving:

Portfolio Intelligence
Leverage and reuse the work you are already doing across all projects. Identify digital components and reuse them to catalyze the efficiency, safety, and quality of future projects.

Digital Design Delivery
Supercharge your adoption of 3D digital design workflows. Create higher quality deliverables with leaner project teams by using digital twin quality validation tools.

Extended Data Governance
Ensure the right people have the right information at the right time across your complex extended project team.

Engineering Work in Progress
Use best-in-class, integrated WIP capabilities to ensure compliant and consistent designs across your dispersed teams and projects.

Now ProjectWise meets the needs of everyone, from your CEO to your project team members.

Manage
For management and partners needing managed collaboration.

Engineer
For engineers and designers collaboratively creating infrastructure models.

Validate
For engineering leadership requiring the most advanced engineering validation and analysis capabilities.

Ready to get started? It is easy, and we can help.

ProjectWise features tiered enterprise offerings tailored to meet the unique needs of different sizes of infrastructure design firms.
